

Cable Knitting

for beginners

Carissa Browning
CarissaKnits.com

Cable knitting may look complicated or intimidating at first, but in reality, all you're doing is rearranging stitches to work them in a different order than they were on the previous row. If you can master the basic building blocks, it's easy to combine them into more intricate designs.

ABBREVIATIONS

BO = bind off

CN = cable needle

CO = cast on

k = knit

p = purl

RS = right side

st(s) = stitch(es)

WS = wrong side

A/B LC = Slip A sts to cable needle and hold in front of work, knit next B sts, knit A sts from cable needle.

A/B RC = Slip B sts to cable needle and hold in back of work, knit next A sts, knit B sts from cable needle.

A/B LPC = Slip A sts to cable needle and hold in front of work, purl next B sts, knit A sts from cable needle.

A/B RPC = Slip B sts to cable needle and hold in back of work, knit next A sts, purl B sts from cable needle.

TOOLS

Cable needles come in all shapes, sizes, and materials. Choose from straight, bent, or hooked... wood, metal, or plastic. Any of these will get the job done, but you'll want to pick one that is equal to or slightly smaller around than the diameter of your knitting needles. This will allow it to grip the stitches well without stretching or distorting them.
